

# PHOEBE LEE

[pholee18@gmail.com](mailto:pholee18@gmail.com) | <https://www.linkedin.com/in/pholee/>

## PROFILE

---

Third year computer science student looking for a role to learn from and grow into whilst completing their studies part-time.

## EXPERIENCE

---

### Koffeecup Studio — Junior UX Designer

SEPTEMBER 2025 - PRESENT

- Owned end-to-end UX for an experiential project, leading design from initial discovery through to final implementation.
- Collaborated with the Head of Marketing to update UX for the Hoomanz.game website and its embedded competition app.
- Designed game features for games 'Interior Designer' and 'Star City' on Meta's platform 'Horizon Worlds'.
- Experience implementing UI in-engine and applying subtle UI animations.

### Koffeecup Studio — UX Design Intern

JUNE 2025 - AUGUST 2025

- Partnered with the UX Lead to design wireframes and user flow maps for mobile and VR games.
- Presented design concepts to team leads and acted as the liaison between design and development teams throughout delivery.
- Interpreted client design documentation and identified UX and business trends, feeding recommendations directly into product decisions.
- Built and documented a component library from scratch, standardising the UX process and reducing design inconsistencies across projects.

## SKILLS

---

**Spoken Languages:** Native English speaker, Semi-proficient in Cantonese

**User Experience Design:** Figma, Userflows, Wireframes, Wireflows, Persona building

**Programming Languages:** Python, Java, C++, SQL, HTML/CSS, JavaScript

**Developer Tools:** Git, React, TailwindCSS, Webflow

## EDUCATION

---

### City St George's, University of London — BSc Computer Science

SEPTEMBER 2024 - PRESENT

First Class - Student representative

### University of Westminster, London — Computer Science Foundation

SEPTEMBER 2023 - JULY 2024

Distinction - Course representative

## PROJECTS

---

### Online Portfolio

- Designed in Figma and built using Webflow.

### Koffeekickstart (client: Koffeecup)

- Managed the project end-to-end from design to development.
- Produced full design, implementation and testing documentation for an employee onboarding web app.
- Designed in Figma; built with React and TailwindCSS, integrating Google SSO, the Notion API and the HiBob API.
