EDUCATION

City St George's, University of London — BSc Computer Science

First Class - Student representative

SEPTEMBER 2024 - PRESENT

University of Westminster, London — Computer Science Foundation

Distinction - Course representative

SEPTEMBER 2023 - JULY 2024

EXPERIENCE

Koffeecup — Junior UX Designer

SEPTEMBER 2025 - PRESENT

- Responsible for own project, from initialisation to implementation.
- In charge of the Hoomanz website and embedded competition app.
- Built game features from scratch, from userflow to wireframes to wireflows.
- Interpreted client design documents and identified business trends to enhance UX.

Koffeecup — UX Design Intern

JUNE 2025 - AUGUST 2025

- Worked closely with the UX Lead to design wireframes and userflow maps for mobile and virtual reality games.
- Presented ideas in meetings with team leads and leased between development teams.
- Built and documented a component library from scratch to streamline and standardise the UX design process.

Meta — Data Analyst Virtual Intern

OCTOBER 2024

- Conducted exploratory data analysis on a data set (two spreadsheets with over 2000 entries).
- Utilised Jupyter and Excel to clean, normalise and visualise data using Python libraries (pandas, Matplotlib) to inform decisions.
- Produced a professional report based on conclusions drawn from data.
- Identified trends in advertisement analytics to formulate an ideal marketing strategy for a mock brand.

Extraman Ltd — Warehouse Operative

AUGUST 2023

- Collaborated with a team of 7 members on-site at L'Occitane, managing the handling and display of cosmetic products.

SKILLS

Spoken Languages: Native English speaker, Semi-proficient in Cantonese

User Experience Design: Figma, Userflows, Wireframes, Wireflows, Persona building

Programming Languages: Python, Java, C++, SQL, HTML/CSS, JavaScript

Developer Tools: Git, React, TailwindCSS

PROJECTS

Online Portfolio

<https://pholee.github.io/Online-Portfolio>

- Designed in Figma and coded using React and TailwindCSS.

Koffeekickstart

- Managed the project from start to finish.
- Produced detailed design, implementation and testing documentation.
- Designed in Figma and coded using React and TailwindCSS with GoogleSSO, NotionAPI and HiBobAPI integration.

UKSEDS National Rocketry Championship 2025

- Managed the soldering and design of electronic circuits, as well as required programming.
- Implemented methods for the collection of environmental data, informing the release of a parachute at apogee.
